

Extrication Challenge Review

Patient 1	Computer Name		Advisors	
Patient 2	Date:	Time:		
Patient 3	Stage number:		Weighting	

Safety	1. Secure 360 approach and access	Initial survey and patient identification	5. Identify and communicate the initial level of consciousness	Airway	10. Management of Patency
	0 2 4 6		0 2 4 6		0 2 4 6
	2. Hazard identification and mitigation		6. Inspect and manage Cat. Haemorrhage	Respiration	11. Present
	0 2 4 6	0 2 4 6	0 2 4 6		
	3. Wear and maintain the correct PPE	7. Report the patient's condition to the team	12. Chest Inspection & Assessment		
	0 2 4 6	0 2 4 6	0 2 4 6		
4. Safety and protection of the patient throughout	Airway	8. Airway manoeuvre	13. Resp / depth / effort rate		
0 2 4 6		0 2 4 6	0 2 4 6		
		9. Airway inspection	14. Interventions, SpO2 and O2		
		0 2 4 6	0 2 4 6		

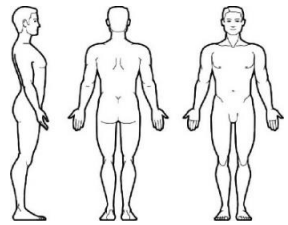

Circulation	15. Management of haemorrhages	Disability	19. Conscious level	Review and presentation	23. Identify all injuries and abnormalities
	0 2 4 6		0 2 4 6		0 2 4 6
	16. Assess circulation		20. Pupils Assessment		24. Appropriate clinical intervention
	0 2 4 6		0 2 4 6		0 2 4 6
	17. Peripheral and/or central pulses		21. CSM Exam		25. Medical history
0 2 4 6	0 2 4 6	0 2 4 6			
18. Cap Refill & Skin		22. Ongoing Assessment	26. Vital signs		
0 2 4 6		0 2 4 6	0 2 4 6		

Medical Actions - Threat to Life - Serious Threat to Life - Not Serious

Patient 1	27. Injury/Medical Issues ID	Patient 2	30. Injury/Medical Issues ID	Patient 3	33. Injury/Medical Issues ID
	0 2 4 6		0 2 4 6		0 2 4 6
	28. ID & Communicate Medical / Physical Entrapment		31. ID & Communicate Medical / Physical Entrapment		34. ID & Communicate Medical / Physical Entrapment
0 2 4 6	0 2 4 6	0 2 4 6	0 2 4 6		
29. Patient Centered Management & Treatment		32. Patient Centered Management & Treatment		35. Patient Centered Management & Treatment	
0 2 4 6		0 2 4 6		0 2 4 6	

Notes

Secondary survey	36. Full patient assessment	Patient-centered	42. Pain and Oxygen Management	Extrication	48. Priorities & Time Management
	0 2 4 6		0 2 4 6		0 2 4 6
	37. Secondary issues identified		43. Handling, Movement & Packaging		49. Ongoing Patient Comfort & Care
	0 2 4 6		0 2 4 6		0 2 4 6
	38. Full History		44. Decision and Management of Spinal Movement Restriction		50. Planning, Supervision & Leadership
	0 2 4 6		0 2 4 6		0 2 4 6
	39. Reassessment and vital signs		45. Rescue / Extrication Management		51. Injury & Interventions Management
	0 2 4 6		0 2 4 6		0 2 4 6
	40. Neurovascular status		46. Pain Recognition & Management		52. Appropriate Patient Packaging, Movement & Handling
	0 2 4 6		0 2 4 6		0 2 4 6
Patient Management	41. Treatment & Planning	Patient Management	47. Patient Centered & Planned	Extrication	53. Reassessed Post Extrication
	0 2 4 6		0 2 4 6		0 2 4 6

Scene management	54. Communications with the patient(s)	Transfer	60. Handover	
	0 2 4 6		0 2 4 6	
	55. Communication with CI and team		Introduction	
	0 2 4 6		MOI	
	56. Triage		Injuries	
	0 2 4 6		Signs and symptoms	
	57. Situational awareness and creation of internal space		Treatment and trends	
	0 2 4 6		Allergies	
	58. Resource and team management		Medications	
	0 2 4 6		Background	
59. Planning and progression	Other			
0 2 4 6
